

EDONY

INDUSTRIAL VARIETY FOR CRISP PROCESSING.

- *High yielding, EDONY is a variety with uniform round shaped tubers.*
- *High level of dry matter.*
- *Low levels of reducing sugars.*
- *Low level of acrylamides.*
- *Resistant to wart disease physio 6.*

PHYSIOLOGY

Skin colour	Yellow
Flesh colour	Yellow
Tuber Shape	Round
Tuber Size	Fairly large
Tubers Number	Fairly high
Tuber Shape Uniformity	Average
Eyes Depth	Fairly deep
Maturity	Late
Dormancy	Average
Physiological Aging	Average
Storage	Fairly good

YIELD - QUALITY

Main use	Crisping
Yield	High
Dry matter content	Very high (> 24%)
Frying colour at harvest	Excellent
Frying colour after cold storage	Fairly good

RESISTANCES

Foliage Blight	Fairly high
Tuber Blight	Fairly high
PVX	n.a
PVY	High
PVY ^{ntn}	Average
PLRV	n.a
TRV	Fairly high
Pitted Common Scab	n.a
Netted Common Scab	n.a
Wart Disease - <i>Physio 1</i>	Very high
Wart Disease - <i>Physio 2</i>	Very high
Wart Disease - <i>Physio 6</i>	Very high

Globodera Rostochiensis - <i>RO 1-4</i>	Excellent
Globodera Rostochiensis - <i>RO 5</i>	n.a
Globodera Pallida - <i>Pa 2-3</i>	n.a
Meloidogyne Chitwoodi	n.a
Erwinia	n.a

OTHER RESISTANCES

Hollow Heart	Average
Mechanical Damages	Fairly high
